Regulate air pressure to this piping system to a maximum of 150 PSI.

Check local building codes before installation.

WARNINGS:
Compressed air is dangerous if not used properly.
Do not point compressed air source at any part of your body or at any person.
Always use eye protection when using compressed air.

20100
1/2" Nylon Tubing
1/2" OD x 3/8" ID Tubing
Sold in 100 ft. roll.
Working Pressure 150 PSI
Temperature Range: -40º to +180º F
Our nylon tubing is lightweight, corrosion/abrasion resistant and extremely durable. Compressor oils have no effect on it’s performance.

-Air Anywhere
-Easy to Install
-Economical
RapidAir is a complete compressed air distribution system that is designed to easily install beneath walls of new construction, or on wall surfaces of existing workshops.

Air Anywhere
No more dragging the compressor behind you and untangling the air hose and electrical cords. Reduce shop clutter and have constant compressed air instantly, anywhere.

RapidAir Compressed Air System allows you to design and install your own pressurized air system, any way you want it.

Economical
An alternative to black or copper pipe installations, the modular design makes it less expensive to install than the traditional methods. With the RapidAir system there is no interior pipe corrosion, which results in longer tool life.

Easy to Install
The RapidAir system includes professional quality Rapid Fittings, air distribution manifolds, air outlets, and nylon tubing. The system is engineered to maintain 150 psi.

RapidAir Fittings
RapidAir fittings are designed to make installation fast and easy. Simply push the tubing firmly into the fitting until seated. If removal is desired, push in evenly on release button and pull tubing out of fitting.
