

## Precision-Tek Mfg., Inc.

*Custom Swiss Screw Machine Products*

As our name implies, “precision” is the cornerstone of our business. Specifiers of custom turned parts rely on us to meet the demands for high levels of dimension tolerances, surface finishes, concentricity and burr-free conditions that are beyond the capabilities of conventional, non-Swiss automatics.

**Quality  
Innovation  
Service**

We manufacture precision screw machine products to customer specifications. We are capable of maintaining accurate tolerances in ten-thousandths (.0001) of an inch with the ability to generate intricate contoured parts with superior aesthetics and surface finish.

Producing parts that range in size from .050" to 1.25" in diameter and up to 4" in length is our niche capability. We can also accommodate longer parts upon your request. We have accommodated specialty production order quantities of 50 to 1,000,000 pieces.

We have experience in machining stainless steels, alloys, plastics, (including virgin teflon and delrin) and other challenging materials. Our innovation and patience is tested time and time again. Even our favorite materials, brass and standard steels receive full attention with material tracking and certificate documentation for maximum raw material traceability.

## What We Do

Swiss Automatics/CNC Swiss

Complete Secondary Department

Statistical Process Control

All Materials—Metals and Plastic

Long or Short Runs

Just-In-Time Deliveries

Capacity .050"—1.25" Diameter

WE ARE PROUD TO BE AN ISO 9001:2000 REGISTERED FIRM.

## Our Mission

Precision-Tek will supply the finest precision Swiss-generated screw machine products to our customers at a fair and competitive price. Our cost-effective processing ensures that our precision parts will be produced and promptly delivered with documented quality and courteous, professional service. What truly sets us apart is our commitment to provide high-quality products, innovative solutions and service that builds lasting relationships.

## Quality

Quality for us is uncompromising. We adhere to a plan, which assures our customers zero defects. First articles, in-process inspection, real-time S.P.C. and final inspection procedures are implemented and maintained. We have performed thorough quality plans and accommodated rigorous quality audits with our customers.

## Innovation

Today's competitive market calls for innovative manufacturing solutions. We believe in partnering with our customers to offer unique alternatives that fit their individual needs. We employ state-of-the-art systems that allow us to offer greater versatility and a wider range of delivery capabilities. We will continue to invest and develop faster processes while constantly striving to better serve your needs.

## Service

We are committed to on-time delivery performance and a satisfying customer experience. We recognize that people are the key to quality and service. Our staff is dedicated to effectively produce and support each phase of the most demanding projects. Your complete satisfaction is our ultimate goal.

If you'd like to partner with a manufacturer who genuinely cares about your success, then contact us. We welcome the challenge of your designs for our superior products and services.

We accept orders from diverse industries, large and small, whose standards for excellence call for the highest level of "precision" that has made Precision-Tek a leader in the Swiss machining field.
