

# 5772-5 COVERSHIELD ANTIMICROBIAL BIOSTATIC SURFACE PROTECTANT

5772-5 COVERSHIELD IS THE NEXT GENERATION OF SURFACE PROTECTION –  
MOVE FROM FREQUENT TREATMENT TO ONE-TIME PREVENTION

5772-5 COVERSHIELD PREVENTS MOLD, MILDEW, ALGAE AND ODOR  
CAUSING BACTERIA FROM REOCCURRING! IMPROVES INDOOR AIR QUALITY!

Four years of test results in the Home, Basement, Industrial Setting and Commercial Building markets have proven it is possible to PROTECT almost any interior or exterior surface.

Can be applied to all interior and exterior surfaces, excluding food-grade surfaces.

## WHAT IT DOES

CoverShield is a colorless, odorless, invisible shield that creates a covalent bond, with durable bio-static activity, to the surface of a wide variety of interior or exterior substrates.

When properly applied, greatly increases the efficiency as a bacteriostatic, fungistatic and algistatic coating protectant.

Prevents premature material deterioration and discoloration, extending the life of any interior or exterior surface.

Provides freshness and combats deterioration and discoloration caused by bacteria, fungi and algae.

## HOW IT WORKS

CoverShield imparts durable biostatic activity to the surface of a wide variety of substrates.

It forms a positively charged layer that molecularly bonds to the treated surface. When a microorganism comes in contact with this layer, the active agent punctures the cell membrane and the electrical charge shocks the cell and physically destroys it.

No hand to Chemical Contact - No Clean up Required! No leaching technology or heavy metals. Safe and harmless to people, pets and the environment.

## COVERSHIELD VS CONVENTIONAL CHEMICAL CLEANERS

Conventional chemical cleaners are short lived, require frequent use and offer no long-term prevention or protection against new microbes from once again forming on the surface.

CoverShield is a one-time application that provides surface protection which creates an inhospitable surface environment that inhibits the growth of microbes.

### Approved Uses For Industrial, Institutional, Commercial or Residential Structures for Non-Food Contact Uses.

Auto, RV's, Trucks, Trailers, Marine, Tents, Tarps and Canopies, Outdoor Apparel, Sports and Other Outdoor Equipment, Gyms & Locker Rooms, Roofing and Framing Material, Canvas, Vinyl, Tile, Wood, Glass, Ceramic, Stone, Plastics

Contact us for a full list of other applications.
