

# Floods are the **#1** natural disaster in the United States.

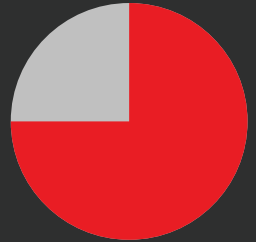

8 out of 10 households are **not** protected by flood insurance - that means only 13% of Florida's 11 million households are covered with flood insurance

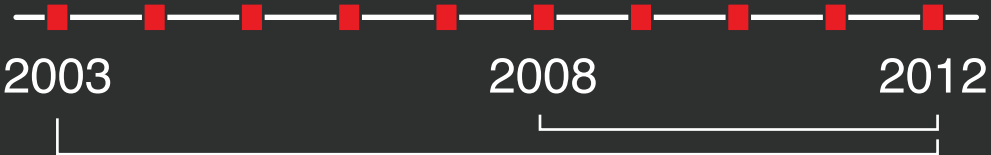

**2/3** of all National Flood Insurance Program required policies nationwide are in **Florida**

**75%** of all Presidential disaster declarations are related to flooding

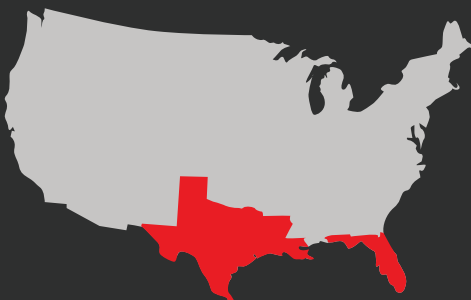

In 2012, the average flood insurance policy premium was about **\$650** per year.

From 2003-2012, total flood insurance claims averaged nearly **\$4 billion** per year.

From 2008-2012, the average flood claim sat at nearly **\$42,000**.

Since 1851, the top 3 states for hurricane landfalls are **Florida, Texas, and Louisiana**

\*according to Atlantic Oceanographic and Meteorological Laboratory in Miami

About 40% of all natural catastrophes worldwide involve flooding.

Nearly **half** of all people killed in floods are those who try **driving through flooded areas**.
