

American Society of Trace Evidence Examiners Student Research Project Supervising Faculty Recommendation Form

Trace Evidence involves the analysis and comparison of many materials such as paint, glass, fibers, hairs, explosive materials, fire debris, and other materials left behind at a crime scene. See the ASTEE website at www.asteetrace.org for more information about this type of evidence.

Criteria: The applicant shall provide a letter of recommendation from the supervising faculty member to include a description of the applicant's research project, how the project is related to Trace Evidence analysis, the applicant's role in the project, and a statement that the applicant is in good academic standing with the college/university. Please feel free to add any additional information regarding this applicant that would be helpful.

Applicant Name: _____

Supervising Faculty Member's Name: _____

Signature: _____ Date: _____

Title of Recommender: _____

College/University: _____

Address: _____

Contact Number & email address: _____
