## FINISHES

Please visit the Segmented Systems Mfg. website for current standard finishes.

## CONSTRUCTION – SPECIFICATIONS

All items are produced to price list specifications unless otherwise advised. All dimensions shown are approximate. The manufacturer reserves the right to make modifications and/or improvements without prior notice.

## FABRIC APPLICATION

Unless otherwise specified, fabric will be applied with the same orientation as it appears on our fabric cards and website. For example, if a pattern runs horizontally in our marketing materials, it will be applied horizontally in our manufacturing process.

Segmented Systems Mfg. is not responsible for charges associated with replacement of products due to incorrect specifications.

## DIRECTIONAL LAMINATE

Laminate is typically applied with the direction of grain as follows:

- The grain runs in the direction of the back edge of corner worksurfaces (not diagonally).
- The grain runs along the length of rectangular worksurfaces.
- The grain runs vertically on support panels having widths narrower than 60" and horizontally for longer widths.

## CUSTOMER'S OWN MATERIAL (COM)

Contact us regarding the use of non-standard or COM materials. Special instructions for handling the material (pattern, directional fabric, correct side of reversible fabric, etc.) must be submitted in writing prior to fabric delivery. In the absence of special instructions, we reserve the right to use our own judgment. We reserve the right to reject any covering which, in our opinion, is unsuitable for our fabricating purposes. However, in no instance shall we be held responsible for unsatisfactory results due to use of Customer's Own Material.
